Environmental Policy

AtSource, the New Zealand distributor of Nederman, is proud to represent a company that cares about the environment. Our business is improving your internal environment, in fact that's our mission – Improving Your Workplace.

As a pioneer in the workspace environment market, both internal and external environmental issues are important for Nederman's business. Nederman has been certified in accordance with ISO 14001 since 1997.

Nederman's business operations and products must result in minimal effects on the internal as well as external environment during the whole life cycle - from raw materials, production and usage to destruction. In addition to meeting current environmental legislation and norms, Nederman will constantly work for environmental improvements together with our partners.

About Nederman Group

Nederman is one of the world's leading companies supplying products and services in the environmental technology sector. The company's products and systems are contributing to the creation of clean and safe working environments focusing on clean air, recycling and environmentally friendly transport management.

Nederman's offering on the market encompasses everything from the design stage through to installation, commissioning and servicing. Sales and marketing are carried out via subsidiaries in 26 countries as well as agents and distributors in over 30 countries.

Nederman develops and produces in its own manufacturing and assembly units in 8 countries.

In April 2010, Dantherm Filtration, with its primary focus on industrial air filtration, was acquired.

The Group was floated in 2007 on OMX Small Cap list; it has circa 1500 employees and a turnover of circa 400 million NZD.

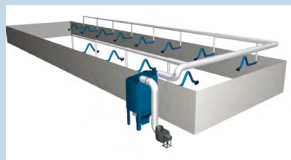

Nederman Engineering and Design

Based on more than 60 years experience of extraction solutions, Nederman offers a unique set-up of tools and services especially developed for system design.

With these tools your planning and design of dust and fume extraction systems will be considerably easier and more cost-effective.

The **Nederman Design Guide** is a practical handbook for planning and designing dust and fume extraction systems. The guide provides facts and hints, overviews of typical applications and design parameters. The overview are followed by detailed product information and specifications.

NEDQuote is a powerful, dynamic program for designing systems in 2D and 3D, and also includes advanced set-up scenarios and cost calculations.

Four Things To Say If You Get Caught Sleeping At Your Desk:

1. "Did you ever notice sound coming out of these keyboards when you put your ear down real close?"
2. "Whew! Guess I left the top off the Whiteout. You probably got here just in time."
3. "This is just a 15 minute power nap they raved about in the time management course you sent me to."
4. "They told me at the Blood Bank this might happen."
